**OFFICE ACTION**

***Response to Arguments***

Applicant's arguments with respect to claims 1-64 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-48 are rejected under 35 U.S.C. 102(b) as being anticipated by Fujimoto et al. (5373523).

With respect to claims 1-2, Fig.1 shows a gas discharge chamber 1 comprising an interior wall comprising a vertical wall and an adjacent bottom wall;

a gas circulation fan 2 creating a gas flow path adjacent the interior vertical wall and the adjacent bottom wall;

an in-chamber dust trap 13a-13b positioned a region of low gas flow.

With respect to claims 3-16, col.5, l.33 discloses the dust trap comprises a plurality of meshed screens (filters).

Art Unit: 2828

With respect to claims 17-48, Fig.1 shows the dust trap extends along the bottom interior wall and a vertical portion of the interior wall.

*Allowable Subject Matter*

Claims 49-64 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The above prior art fails to disclose the limitations as recited in the claims.
